## Software Developer

**Summary** I'm a professional software developer with 6+ years of experience dedicated to quality, robustness, reliability and above all professionalism. During my career I've had the pleasure of working with many different technologies, the result of which being me forming excellent problem solving skills, in particular, working with distributed systems.

**Technologies** Go, PHP, JavaScript, Python, C SQL (MariaDB, PostgreSQL), Mongo, ScyllaDB, Redis Docker, RabbitMQ, POSIX Shell HTML, CSS

**Experience** **Nano Interactive Gmbh (09/2020 - today)**  
A digital marketing company with in-house programmatic advertising infrastructure focused on developing identity-free (without cookies) targeting.  
  
My main responsibilities include building and maintaining several different components written primarily in the Go programming language with some legacy systems written in PHP.

**Uon DOO (10/2018 - 04/2020)**  
A startup company in Belgrade that primarily outsourced programming and consulting services to third party clients.  
  
While working there, I was tasked with building backend services for various mobile, desktop and web applications using JavaScript and PHP. I was also in charge of automated deployment with Docker and CircleCI.

**Education** **ICT College of Vocational Studies (2017 - N/A)**  
I studied computer networks and telecommunications for three years before ultimately dropping out to focus on my programming career.

**Gimnazija u Obrenovcu (2012 - 2016)**  
A high school where I studied natural science & mathematics.

**Languages** **Serbian**  
Native, full professional proficiency, written and spoken.

**English**  
First foreign language, full professional proficiency, written and spoken.

**Russian**  
Second foreign language, basic understanding.
